

Responsible Project Management Canvas

Action Plan to develop Responsible Project Management

		What action is required?	By whom?	By when?
	1.	Understand the purpose underpinning a project from different perspectives.		
	2.	Raise awareness of possible project impacts and consequences.		
	3.	Engage a wide range of stakeholders and promote common interests.		
	4.	Be curious and uncover ethical complexity, conflict and unintended outcomes.		
	5.	Recognise uncertainty and encourage sharing of new knowledge.		
	6.	Anticipate change, evaluate options and promote informed decision making.		
	7.	Make space for imagination, understand the need for creativity and innovation.		
	8.	Foster transparency with opportunities for sharing vision, thoughts, and feelings.		
	9.	Encourage stewardship of human, environmental and financial resources.		
	10.	Seek balance between the needs of people, planet and profit, short v long term.
